## PROFILE

Computer Science graduate with strong analytical and problem-solving skills and hands-on experience in Python, Machine Learning, and Computer Vision, seeking a data-driven role in analytics and AI.

## EXPERIENCE

**SOFTWARE DEVELOPER**, *Vinayan India Consulting, Delhi* May 2025 – Dec 2025

Developed Python automation pipelines for vehicle e-challan processing. Implemented real-time vehicle and license plate recognition using OpenCV and deep learning, reducing manual effort through automated reporting.

**DATA SCIENCE INTERN**, *CRIS (Indian Railways), Delhi* Jul 2024 – Sep 2024

Built machine learning models for freight demand forecasting. Performed data cleaning, feature engineering, and exploratory data analysis using Pandas and NumPy.

## KEY PROJECTS

**RAG-Based AI Chatbot (LLM & NLP):** Built an LLM-powered chatbot using Retrieval-Augmented Generation (RAG), embeddings, and vector databases for accurate contextual responses.

**AI Resume Shortlisting System (Machine Learning):** Developed an automated resume ranking system using BERT embeddings and Flask REST APIs to shortlist candidates.

**Waste Classification System (Computer Vision):** Designed a CNN-based image classification model achieving 93% accuracy for automated waste segregation.

## EDUCATION

**B.TECH IN COMPUTER SCIENCE & ENGINEERING** 2021 – 2025
*Sunder Deep Engineering College (AKTU), Ghaziabad*

## SKILLS

Programming: Python, SQL, C++
Web Technologies: HTML, CSS, React.js, Flask, Streamlit
Machine Learning & Deep Learning: ML, DL, Scikit-learn, TensorFlow
Computer Vision: OpenCV
Data Analysis & BI: Pandas, NumPy, Microsoft Excel, Power BI
Databases: MySQL, MongoDB
Tools & Concepts: Git, VS Code, Jupyter, OOP, DSA, DBMS

## CERTIFICATIONS

Data Scientist — Ducat IT India | Data Analytics — Coursera

## LANGUAGES

Hindi — Native | English — Professional Proficiency
